Journal of Immunological Methods, 130 (1990) 293–294
Elsevier

Contents to volume 130 (1990)

Number 1 — 12 June 1990

Research reports

Anti-actin antibodies: a new test for an old problem
M. Fusconi, F. Cassani, D. Zauli, M. Lenzi, G. Ballardini, U. Volta and F.B. Bianchi (Italy) 1

The determination of IgE synthesis in vitro. Methodological aspects
A. Gamkrelidze and B. Björkstén (Sweden) 9

A method for isolating neutrophils from moderate volumes of human blood
S.J. McFaul (U.S.A.) 15

A sensitive ELISA system for the rapid detection of virus specific IgM antibodies in the cerebrospinal fluid
M.K. Sharief and E.J. Thompson (U.K.) 19

Growth of rat-mouse hybridoma cells in immunosuppressed hamsters. An easy and effective method to prepare monoclonal antibodies from heterohybridoma cell lines
T. Kayano, R. Motoda, M. Usui, S. Ando, T. Matuhasi and M. Kurimoto (Japan) 25

Effects of histidine residues on adsorption equilibrium of peptide antibodies
E. Sada, S. Katoh and Y. Sohma (Japan) 33

Imaging infections with antibodies. A quantitative autoradiographic analysis
E.M. Morrel, R.G. Tompkins, A.J. Fischman, R.A. Wilkinson and M.L. Yarmush (U.S.A.) 39

Selective cloning of B cell hybridoma-specific rearranged immunoglobulin gene loci using the polymerase chain reaction
M. Zwickl, D. Zaninetta, G.K. McMaster and N. Hardman (Switzerland) 49

Rapid quantitative method for measuring phagocytosis of *Leishmania* promastigotes using a double radiolabelling method
E. Cillari, S. Milano and M. Dieli (Italy) 57

False-positive signals in enzyme immunoassay (EIA) interactions between rodent IgG subclasses
R. Pearce-Pratt and B. Roser (U.K.) 65

Measurement of alloantibody by flow cytometry
P.L. Leenaerts, D. De Ruysscher, M. Vandeputte and M. Waer (Belgium) 73

Inhibition of urokinase activity and prevention of urokinase receptor binding by monoclonal antibodies
U. Zacharias, W. Handschack, F. Schneider, K. Löster, C. Kleitke, F. Noll and H. Will (G.D.R.) 81

Use of anti-CD3 monoclonal antibody in the generation of effector cells from human solid tumors for use in cancer biotherapy
J.R. Yannelli, D.B. Crumpacker, R.W. Good, C.D. Friddell, R. Poston, S. Horton, J.R. Maleckar and R.K. Oldham (U.S.A.) 91

Generation and characterization of peptide-specific, MHC-restricted cytotoxic T lymphocyte (CTL) and helper T cell lines from unprimed T cells under microculture conditions
S.R. Sambhara, A.G. Upadhya and R.G. Miller (Canada) 101

Combined immunocytochemical staining and image analysis for the study of lymphocyte specificity and function in situ
A.R. Brown (U.S.A.) 111

Analysis of the optimal conditions for the adsorption of type III pneumococcal polysaccharide to plastic for use in solid-phase ELISA
K.L. Elkins, P.W. Stashak and P.J. Baker (U.S.A.) 123

A quantitative dot immunobinding assay for coagulation factor XII in plasma
W.A. Wuillemin, M. Furlan and B. Lämmle (Switzerland) 133

Discrimination by rabbit anti-idiotypic antibodies of two murine IgM monoclonal antibodies directed against lipid A
J.J. Cornelissen, T.A.M. Oosterlaken, J. Schellekens, R. Torensma, M. Rozenberg-Arska, C.A. Kraaijeveld and J. Verhoef (The Netherlands) 141

Letter to the editors

Towards an optimized MTT assay
M. Nikš and M. Otto (Czechoslovakia) 149

Book review 153

Announcement from the publisher 154

Notes to authors 155

Number 2 — 3 July 1990

Research reports

Development of a radioimmunoassay for human metallothionein
T.P.J. Mulder, A.R. Janssens, H.W. Verspaget and C.B.H.W. Lamers (The Netherlands) 157

Determination of mixed chimerism by a simple flow cytometry method
P.L. Leenaerts, M. Vandeputte and M. Waer (Belgium) 163

Quantitation of polymorphonuclear leukocyte adherence to endothelial cells by electronic particle size discrimination
S.J. McFaul and P.D. Bowman (U.S.A.) 171

Highly sensitive enzyme immunoassay for human lymphotoxin (tumor necrosis factor β) in serum
G.R. Adolf and H.R. Lamche (Austria) 177

Filter spot-ELISA for the enumeration of interferon-α antibody-secreting cells
O. Prümmer, B. Cederblad, G. Alm, N. Drees and F. Porzsolt (F.R.G., Sweden) 187

An improved conjugation method for controlled covalent coupling of synthetic peptides to proteins using glutaraldehyde in a dialysis method
N. Zegers, K. Gerritse, C. Deen, W. Boersma and E. Claassen (The Netherlands) 195

The in vitro lymphocyte/endothelium binding assay. An improved method employing light microscopy
K.U. Willführ, U. Hirschfeld, J. Westermann and R. Pabst (F.R.G.) 201

Production of human monoclonal IgG antibodies reacting with cytomegalovirus (CMV)
D. Bron, A. Delforge, L. Lagneaux, G. De Martynoff, E. Basmans, P. Van der Auwera, R. Snoeck, A. Burny and P. Stryckmans (Belgium) 209

Microenzyme immunoassay for the measurement of brain natriuretic peptide (BNP)-like immunoreactivity in porcine plasma
M. Takeyama, F. Yasunaga, A. Otaka, N. Fujii and H. Yajima (Japan) 217

Measurement of superoxide release in the phagovacuoles of immune complex-stimulated human neutrophils
T.C. Ryan, G.J. Weil, P.E. Newburger, R. Haugland and E.R. Simons (U.S.A.) 223

An assay to quantitate the binding of leishmania amastigotes to macrophages
D.M. Mosser (U.S.A.) 235

A rapid one step purification procedure for murine IgD based on the specific affinity of *Bandeiraea (Griffonia) simplicifolia-1* for N-linked carbohydrates on IgD
J.D. Oppenheim, A.R. Amin and G.J. Thorbecke (U.S.A.) 243

An improved double fluorescence flow cytometry method for the quantification of killer cell/target cell conjugate formation
L. Cavarec, A. Quillet-Mary, D. Fradelizi and H. Conjeaud (France) 251

Regeneration of immunosorbent surfaces used in clinical, industrial and environmental biosensors. Role of covalent and non-covalent interactions
G.C. Blanchard, C.G. Taylor, B.R. Busey and M.L. Williamson (U.S.A.) 263

Preparation of large numbers of highly purified normodense human eosinophils from leukapheresis
M.K. Bach, J.R. Brashler and M.E. Sanders (USA) 277

Letter to the editors

Isolation of highly purified human blood monocytes for in vitro HIV-1 infection studies of monocyte/macrophages
N.F. Hassan, J.R. Cutilli and S.D. Douglas (U.S.A.) 283

Corrigendum

Single-step purification of immunoglobulin M on Clq-Sepharose
A. Nethery, R.L. Raison and S.B. Easterbrook-Smith (Australia) 287
